# Digital Literacy for Students

## What is Digital Literacy?

- Definition: It's more than just using a computer; it's the ability to find, evaluate, and communicate information through various digital platforms.
- Key Skill: Critical thinking—learning how to tell the difference between "fake news" and credible academic sources.

## Professional Online Presence

- LinkedIn Essentials: Keep your profile professional by adding your current degree, institution, and expected graduation year.
- GitHub for Students: Use it as a digital scrap-book to show off your coding projects and collaboration skills to future employers.

## Safe Internet Practices

- Password Hygiene: Use strong, unique passwords and enable Two-Factor Authentication (2FA) whenever possible.
- Spotting Phishing: Be wary of unexpected emails asking for login details or urgent UPI payments.
- Reporting: If you see something suspicious, use the National Cyber Crime Portal (cybercrime.gov.in)
